LinkedIn: linkedin.com/in/mejatinrajani · Portfolio: mejatinrajani.vercel.app

PROFESSIONAL SUMMARY

Cloud-Native Full Stack and Applied AI Developer with hands-on internship experience building production-grade systems across frontend experiences, backend APIs, multimodal deep learning, and Advanced RAG pipelines. Seeking roles in AI/ML or Full Stack Development to contribute to real-world systems from day one.

EDUCATION

Bachelor of Technology in Computer Science, GLA University, Mathura, India

May 2027

PROFESSIONAL EXPERIENCE

Software Engineering Intern, ShunyaTech (Remote)

Jan 2026 – Feb 2026

Engineered a Hybrid Graph and Vector RAG chatbot from scratch, combining BM25 sparse retrieval with dense vector search, and utilizing hierarchical chunking to process unstructured data into JSON. Achieved ~95% retrieval accuracy and ~35ms latency by integrating advanced NLP pipelines—including intent detection, query rewriting, and cross-encoder reranking.

Full Stack Developer Intern, MultiForgeX (Remote)

Sep 2025 – Nov 2025

Optimized an existing platform's overall performance by ~30% by enhancing frontend responsiveness, refactoring 5+ core CRUD workflows and slashing authentication latency to less than 200ms. Additionally, crafted an immersive 3D website from scratch using React and Three.js, seamlessly integrating 3+ custom Blender models.

TECHNICAL PROJECTS

NexusMind, Enterprise Agentic RAG Platform — Python · FastAPI · React · LangGraph · Neo4j · ChromaDB · AWS Textract

Architected a multi-tenant, no-code platform for building custom Hybrid RAG agents with configurable agent personas, system prompts, and isolated knowledge bases per tenant. Designed a multimodal ingestion pipeline that transforms unstructured PDFs, images, and documents into searchable graph and vector knowledge bases, and implemented LangGraph-based orchestration with intelligent retrieval routing, fault-tolerant model fallbacks, and real-time monitoring across 3+ supported LLM providers. **View Project**

Chronaxis, Automated Timetable Generation System — Google OR-Tools · FastAPI · React · TypeScript · Excel

Formulated a constraint-based timetable generation system leveraging CP-SAT, capable of scheduling 5,000+ slots at once, handling 100+ rooms and 100+ faculty members simultaneously, generating large institutional timetables in under 5 minutes and smaller ones in under 2 minutes. Integrated drag-and-drop editing, real-time conflict detection, Excel import/export, and multi-perspective views for students, teachers, and rooms with full history tracking. **View Project**

Astika, Vedic Astrology Intelligence Platform — Python · FastAPI · React · Swiss Ephemeris

Orchestrated a full-stack Vedic astrology platform featuring 50+ deterministic engines for high-precision, location based calculations across rashi, nakshatra, transits, dosha and yoga detection, dasha timelines, guna milan, and divisional charts. Delivered structured insights and daily predictions across career, health, personality & relationships. Integrated an intent-aware chatbot for natural language query handling backed by strict rule-based accuracy. **View Project**

TECHNICAL SKILLS

Programming Languages: Python · JavaScript (ES6+) · TypeScript · Java

AI & Machine Learning: Multimodal Models · Transformers · Deep Learning · Computer Vision · NLP · RAG (Naive, Advanced, Hybrid, Graph, Multimodal, Self-Reflective) · Generative AI · LLM Fine-tuning

Backend Development: FastAPI · Django · Django REST Framework · Node.js · Express.js · Flask

Frontend Development: React.js · HTML5 · CSS3 · Tailwind CSS · Zustand

Databases: PostgreSQL · MongoDB · MySQL · Neo4j · ChromaDB · Supabase · Django ORM

Cloud & DevOps: AWS · Docker · CI/CD · Vercel · Render · Netlify

Tools & Practices: Git · GitHub · n8n · Agile · Postman · VS Code
