EDUCATION

Bachelor of Technology in Computer Science, GLA University, Mathura	June 2027
Intermediate & High School, Ben-Hur Public School, Pilibhit	May 2023

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, KodeVortex (Remote Internship)	Jun 2025 – Aug 2025
Developed and optimized full-stack features including authentication systems and CRUD workflows, improving application responsiveness and user interaction through frontend performance enhancements.	
Full Stack Developer & Computer Vision Intern, MultiForgeX (Remote Internship)	Sep 2025 – Nov 2025
Built a full-stack application with secure authentication and payment integration, and implemented an AI-based virtual try-on system for rings using computer vision, along with interactive 3D web experiences using Three.js and Blender.	

PROJECTS

MHPCD, Multimodal Hinglish Predatory Comment Detector (PyTorch • Transformers • FastAPI • Computer Vision • NLP)
Constructed an AI-powered moderation system for context-aware detection of predatory and abusive behavior in Indian social media conversations. Architected a multimodal fusion pipeline utilizing SigLIP and BGE-M3 encoders with cross-modal attention to analyze images and Hinglish comments simultaneously, supported by a robust backend for processing complex inputs.
NexusMind, Enterprise Agentic RAG Platform (Python • FastAPI • React • LangGraph • Neo4j • ChromaDB • AWS Textract)
Architected a multi-tenant, no-code platform for building custom Hybrid RAG agents , allowing users to define agent personas, system prompts, and knowledge sources. Designed a multimodal ingestion system that transforms any unstructured data into searchable graph and vector knowledge bases . Implemented LangGraph-based agent orchestration with intelligent retrieval routing, fault-tolerant model fallbacks, and real-time monitoring capabilities.
Chronexis, Automated Time Table Generation System (Google OR-Tools • FastAPI • React • TypeScript • Excel)
Orchestrated an automated, large-scale timetable generation system supporting 5000+ slots to create conflict-free schedules with balanced workloads and efficient class allocation. Integrated features for drag-and-drop editing, add/delete class flexibility, real-time conflict detection , Excel import/export, and enabled multi-perspective timetable views for students, teachers, and rooms with reverse scheduling and history tracking.

SKILLS

Core Expertise	Full Stack Engineering • Backend Systems & API Development • AI Integration & RAG
Programming Languages	Python • JavaScript (ES6+) • TypeScript • Java
Backend Development	FastAPI • Django • Django REST Framework (DRF) • Node.js • Express.js • Flask
AI & Machine Learning	Vector Databases & RAG • Agentic Workflows • Deep Learning • Generative AI
Databases	PostgreSQL • MySQL • SQLite • MongoDB • Mongoose • Django ORM • Supabase (BaaS) • Neon (Serverless Postgres)
Frontend Development	React.js • HTML5 • CSS3 • Tailwind CSS • Context API • Zustand
Cloud & DevOps	AWS • Docker • CI/CD Fundamentals • Vercel • Render • Netlify
